UNANIMOUS DECISIONS

This figure shows the raw percentage of unanimous (i.e., cases decided without any full dissents) between OT05-OT24 given the total number of cases decided in those terms. These include decisions reached *per curiam* without any noted dissents.

FREQUENCY IN THE MAJORITY – All Cases

Figure shows the percentage of cases where each Justice was in the Majority coalition among all cases (including those decided unanimously or *Per Curiam*).

FREQUENCY IN THE MAJORITY – Non-Unanimous Cases

Figure shows the percentage of cases where each Justice was in the Majority coalition among cases decided without a unanimous majority.

FREQUENCY IN THE MAJORITY – Closely Divided Cases

Figures show the percentage of cases where each Justice was in the Majority coalition among cases decided by (5-4) or (6-3) coalitions.

BREAKING RANKS

This figure shows the coalition behaviors of Justices in non-unanimous cases between the 2020 and 2024 terms. The **DARK GREY** bars represent the percentage of cases where a Justice joined a coalition consisting of all the Justices appointed by a President of a different party. Alternatively, the **LIGHT GREY** bars indicate the percentage of cases where a Justice was the lone dissenter from a coalition consisting of the remaining same-party appointees.

DARK GREY Ex(s): In approximately 38% of cases, Chief Justice Roberts and Justice Kavanaugh joined a coalition that also included all those appointed by Democratic presidents. Alternatively, Justice Breyer joined a coalition consisting of all the Republican appointees in 8.1% of cases.

Note: This does not mean they were the lone Republican (Democratic) appointee(s) to do so in a particular case.

LIGHT GREY Ex(s): In 2.5% of cases, Justice Roberts was the lone Republican appointee to break from a coalition consisting of the remaining Republican appointees. Justice Sotomayor was likewise the lone defector from a coalition consisting of all the remaining Democratic appointees in 4.4% of cases.

JUSTICE AGREEMENT – All Cases

Figure shows the relative agreement (percent) in voting alignment shared between Justices in all cases during the 2024 Term.

Agreement can be understood as Justices similarly aligning in the Majority (or Dissenting) coalition – where those who concur (fully, in part, or in judgement) are similarly considered as part of the majority.

JUSTICE AGREEMENT – Closely Divided Cases

Figure shows the relative agreement (percent) in voting alignment shared between Justices in cases decided by (5-4) or (6-3) coalitions during the 2024 Term.

Agreement can be understood as Justices similarly aligning in the Majority (or Dissenting) coalition – where those who concur (fully, in part, or in judgement) are similarly considered as part of the majority.

MERITS DECISIONS BY VOTE SPLIT – All Cases

2005-2024 Terms

2020-2024 Terms

2024 Term

Figures show the percent of cases decided by different coalition sizes between the 2005 and 2024 terms. For instances where Justices were recused or did not participate in an otherwise unanimous decision, we coded these as *unanimous* (e.g., 8-0 decisions were included in calculating 9-0 coalitions).

MERITS DECISIONS BY VOTE SPLIT– Ideologically Split Cases

2005-2024 Terms

2020-2024 Terms

2020-2024 Terms

Figures show the percent of cases decided by ideologically split coalitions (e.g., 5-4 or 6-3), such that ideologically liberal and conservative Justices represent competing coalitions. Ideology was derived by referencing each Justices' associated [Martin-Quinn](#) score. For reference, such a split during the 2024 term would be a majority consisting of Chief Justice Roberts and Justices Thomas, Alito, Gorsuch, Kavanaugh, and Barrett – with a competing (dissenting) coalition of Justices Sotomayor, Kagan, and Jackson.

JUDICIAL REVIEW

The top figures show the volume of cases between the 1986 and 2024 terms where (i) an existing precedent was altered (and) or (ii) the Court declared a federal, state, or municipal law or act unconstitutional. Alternatively, the bottom illustrates the total number of cases decided by the Court during those terms – including those decided without oral arguments. The colors represent the distinction between the periods where William Rehnquist or John Roberts serve as Chief Justice.

COALITION ALIGNMENTS

* Ideological splits represent instances where Justices representing divergent ideological orientations (i.e., *Liberal* or *Conservative*) according to [Martin-Quinn](#) populate the Majority and Dissenting Coalitions. For OT10-OT19, this represents a (5-4) all-Conservative majority – Since OT20, this represents an all-Conservative (6-3) majority.

CIRCUIT SCORECARD

For the Circuit Scorecard, we treat consolidated cases emerging from different courts below as separate entries. For example, a consolidated case emerging from conflicting decisions in the Fifth and Ninth U.S. Circuit Courts of Appeal are coded as two independent entries. Alternatively, consolidated cases emerging from the same court below (e.g., both emerging from the Fifth Circuit) are treated as a single entry.

Court below	# of Cases	% of Cases	# Decided	# Affirmed	# Reversed	% Affirmed	% Reversed
