Introduction

Key Findings in the Stat Pack for the 2025-26 term

1. **Roberts and Kavanaugh at the Helm.** Chief Justice Roberts and Justice Kavanaugh tied for the top frequencies in the majority, followed by Justice Barrett. Roberts and Kavanaugh were both in the majority 95% of the time while Barrett was in the majority 92% of the time. This ordering is the same for frequencies in the majority in non-unanimous and closely divided cases.
2. **Ideological Splits in Closely Divided Cases.** 1 in 5 of the Court's decisions this term were decided 6-3 along ideological lines. This far exceeds the 11% average for the 2020-2021 through 2024-2025 terms.
3. **Birds of the Same Feather (Vote Together).** Multiple justice pairs agreed at the highest level. Across all cases, Justices Kagan and Sotomayor, Kavanaugh and (CJ) Roberts, Jackson and Sotomayor, and Thomas and Alito all agreed 94% of the time.
4. **Justices Thomas and Jackson are (Again) Prolific Writers.** Justice Thomas authored the most opinions this term with 28 (total) and the most concurrences with 15, while Justice Jackson authored the second most with 26 (total) but had the most dissents with 10. Chief Justice Roberts authored the fewest with 6 total (all majority opinions).
5. **Some (Very) Long Opinions.** The longest overall decision this term was *Trump v. Barbara* (Birthright Citizenship) at over 60,000 total words, while the longest individual opinions were Justice Thomas' dissent in *Barbara* and Justice Kavanaugh's dissent in *Learning Resources* (Tariffs). Chief Justice Roberts averaged the longest opinions this term at approximately 7,100 words. Moreover, 4 of the 5 longest individual opinions this term were dissents.

Unanimity

Description: This figure shows the percentage of unanimous decisions (i.e., cases decided without any full dissents) between OT05-OT25. These include decisions reached per curiam without any noted dissents. Dashed red line represent longitudinal average.

Frequency in the Majority – All Cases

Description: Figure shows the percentage of cases where each justice was in the majority coalition among all cases that they participated in (including those decided *unanimously*, *per curiam*, or *dismissed as improvidently granted*).

Frequency in the Majority – Non-Unanimous Cases

Description: Figure shows the percentage of cases where each justice was in the majority coalition among cases decided without a unanimous majority.

Frequency in the Majority – Closely Divided Cases

Description: Figures show the percentage of cases where each justice was in the majority coalition among cases decided by (5-4) or (6-3) coalitions.

Justice Agreement – All Cases

Description: Figure shows the relative agreement (percent) in voting alignment shared between justices in all cases where justices participated during the 2025-26 term.

Justice Agreement – Closely Divided Cases

Description: Figure shows the relative agreement (percent) in voting alignment shared between justices in cases decided by (5-4) or (6-3) coalitions in the 2025-26 term.

Decisions by Vote Split – All Cases

2005-2024 Terms

2020-2024 Terms

2025-26 Term

Description: Figures show the percent of cases decided by different coalition sizes between the 2005 and 2025 terms. For instances where justices were recused or did not participate in an otherwise unanimous decision, we coded these as *unanimous* (e.g., 8-0 decisions were included in calculating 9-0 coalitions).

Decisions by Vote Split – Ideologically Split Cases

2005-2024 Terms

2020-2024 Terms

2025-26 Term

Description: Figures show the percent of cases decided by ideologically split coalitions, consisting of Chief Justice Roberts and Justices Thomas, Alito, Gorsuch, Kavanaugh, and Barrett on one side, and Justices Sotomayor, Kagan, and Jackson on the other.

Description: Table reflects the rates of affirmance and reversal for cases decided during OT25 that emerged from the U.S. Courts of Appeals.

Notes: (1) We treat consolidated cases emerging from the same lower court as single entries. (2) Decisions that were granted review but subsequently dismissed (as improvidently granted) are omitted. (3) *Trump v. Cook* (25A312) resulted in a denial of an application for stay and is treated here as having *Affirmed* CADC. (4) Table further includes the following decisions from consolidated proceedings: 25-567 (CA2, Affirm); 25-1084 (CADC, Reverse); 24-38 (CA9, Reverse); 25-250 (CAFED, Affirm)

Description (Top-Left): Table provides the average elapsed period (in days) between oral arguments and the rendering of a decision given which Justice authored the opinion. For example, a decision where the majority opinion was authored by Justice Barrett required an average of 130.71 days following oral argument.

Description (Top-Right): Table provides the five decisions with the longest and shortest elapsed periods between oral argument and the rendering of a decision during the 2025 term.

Description (Bottom-Left): Figure shows the average number of days between oral arguments and the rendering of a decision for a case between the 2005 and 2025 terms.

Descriptions:

Longest (Total Combined): Table represents cases with the largest total word count combined across the published majority and separate opinions. For example, the 7 opinions published in *Learning Resources, Inc. v. Trump* (24-1287) totaled approximately 50,000 words – which included both a dissent filed by Justice Kavanaugh (≈ 19,000 words), as well as a separate concurrence filed by Justice Gorsuch (≈ 14,700 words).

Shortest (Longest) (Individual Opinions): Table represents the shortest (longest) opinions filed by individual justices (or per curiam). For example, Justice Kagan's dissenting opinion in *Louisiana v. Callais* represents one of the longest individual opinions this term at approximately 16,000 words.
