Unanimity

Description: This figure shows the percentage of unanimous decisions (i.e., cases decided without any full dissents) between OT05-OT25. These include decisions reached per curiam without any noted dissents. Dashed red line represent longitudinal average.

Frequency in the Majority – All Cases

Description: Figure shows the percentage of cases where each justice was in the majority coalition among all cases that they participated in (including those decided *unanimously*, *per curiam*, or *dismissed as improvidently granted*).

Frequency in the Majority – Non-Unanimous Cases

Description: Figure shows the percentage of cases where each justice was in the majority coalition among cases decided without a unanimous majority.

Frequency in the Majority – Closely Divided Cases

Description: Figures show the percentage of cases where each justice was in the majority coalition among cases decided by (5-4) or (6-3) coalitions.

Justice Agreement – All Cases

Description: Figure shows the relative agreement (percent) in voting alignment shared between justices in all cases where justices participated during the 2025-26 term.

Justice Agreement – Closely Divided Cases

Description: Figure shows the relative agreement (percent) in voting alignment shared between justices in cases decided by (5-4) or (6-3) coalitions in the 2025-26 term.

Decisions by Vote Split – All Cases

2005-2025 Terms

2020-2025 Terms

2025-26 Term

Description: Figures show the percent of cases decided by different coalition sizes between the 2005 and 2025 terms. For instances where justices were recused or did not participate in an otherwise unanimous decision, we coded these as *unanimous* (e.g., 8-0 decisions were included in calculating 9-0 coalitions).

Decisions by Vote Split – Ideologically Split Cases

2005-2025 Terms

2020-2025 Terms

2025-26 Term

Description: Figures show the percent of cases decided by ideologically split coalitions, consisting of Chief Justice Roberts and Justices Thomas, Alito, Gorsuch, Kavanaugh, and Barrett on one side, and Justices Sotomayor, Kagan, and Jackson on the other.

Description (Top-Left): Table provides the average elapsed period (in days) between oral arguments and the rendering of a decision given which Justice authored the opinion. For example, a decision where the majority opinion was authored by Justice Barrett required an average of 136 days following oral argument.

Description (Top-Right): Table provides the five decisions with the longest and shortest elapsed periods between oral argument and the rendering of a decision during the 2025 term.

Description (Bottom-Left): Figure shows the average number of days between oral arguments and the rendering of a decision for a case between the 2005 and 2025 terms.

Descriptions:

Longest (Total Combined): Table represents cases with the largest total word count combined across the published majority and separate opinions. For example, the 7 opinions published in *Learning Resources, Inc. v. Trump* (24-1287) totaled approximately 45,000 words – which included both a dissent filed by Justice Kavanaugh (≈ 17,000 words), as well as a separate concurrence filed by Justice Gorsuch (≈ 14,000 words).

Shortest (Longest) (Individual Opinions): Table represents the shortest (longest) opinions filed by individual justices (or per curiam). For example, Justice Kagan's dissenting opinion in *Louisiana v. Callais* represents one of the longest individual opinions this term at approximately 13,900 words.

Notes: (1) Cases that were dismissed as improvidently granted (e.g., *Hamm v. Smith*) are omitted from *smallest individual opinions*.
