For the circuit scorecard only, we treat consolidated cases that stemmed from different lower court decisions separately to most accurately reflect the Supreme Court’s treatment of the precedents below; we treat consolidated cases that stemmed from the same lower court as one case. We include as “affirmances” merits opinions that let stand the lower-court opinion, and as “reversals” opinions that only vacate the lower-court decision and remand for further consideration.

FREQUENCY IN THE MAJORITY – All Cases

Figure shows the percentage of cases where each Justice was in the Majority coalition among all cases (including those decided unanimously or *Per Curiam*).

FREQUENCY IN THE MAJORITY – Non-Unanimous Cases

Figure shows the percentage of cases where each Justice was in the Majority coalition among cases decided without a unanimous majority.

FREQUENCY IN THE MAJORITY – Closely Divided Cases

Figures show the percentage of cases where each Justice was in the Majority coalition among cases decided by (5-4) or (6-3) coalitions.

MERITS DECISIONS BY VOTE SPLIT – All Cases

2005-2024 Terms

2020-2024 Terms

2024 Term

Figures show the percent of cases decided by different coalition sizes between the 2005 and 2024 terms. For instances where Justices were recused or otherwise did not participate, we associated the most comparable coalition size (e.g., 8-0 decisions were included in calculating 9-0 coalitions, while 7-1 were likewise coded as 8-1 – the principal reference being the number of dissenting Justices).

MERITS DECISIONS BY VOTE SPLIT– Ideologically Split Cases

2005-2024 Terms

2020-2024 Terms

2020-2024 Terms

Figures show the percent of cases decided by ideologically split coalitions (e.g., 5-4 or 6-3), such that ideologically liberal and conservative Justices represent competing coalitions. Ideology was derived by referencing each Justices’ associated [Martin-Quinn](#) score. For reference, such a split during the 2024 term would be a majority consisting of Chief Justice Roberts and Justices Thomas, Alito, Gorsuch, Kavanaugh, and Barrett – with a competing (dissenting) coalition of Justices Sotomayor, Kagan, and Jackson.

UNANIMOUS DECISIONS

This figure shows the raw percentage of unanimous (i.e., cases decided without any full dissents) between OT05-OT24 given the total number of cases decided in those terms.

UNANIMOUS DECISIONS

This figure shows the percentage of unanimous Supreme Court decisions from OT05-OT24. The size of the bars indicate how *surprising* or *typical* each year's unanimity was – such that higher (lower) indicates greater (lesser) unanimity than expected given the caseload.

JUDICIAL REVIEW

The top figures show the volume of cases between the 1986 and 2024 terms where (i) an existing precedent was altered (and) or (ii) the Court declared a federal, state, or municipal law or act unconstitutional. Alternatively, the bottom illustrates the total number of cases decided by the Court during those terms – including those decided without oral arguments. The colors represent the distinction between the periods where William Rehnquist or John Roberts serve as Chief Justice.

OT24	7	23%	0%	12
Average	24.46	35.3%	11.4%	23.5
* Ideological splits represent instances where Justices representing divergent ideological orientations (i.e., <i>Liberal or Conservative</i>) according to Martin-Quinn populate the Majority and Dissenting Coalitions. For OT10-OT19, this represents a (5-4) all-Conservative majority – Since OT20, this represents a (6-3) all-Conservative majority.				

BREAKING RANKS

This figure shows the behaviors of Republican-appointed Justices in non-unanimous cases during the 2020-2024 terms. The **BLUE** bars represent the percentage of cases where a Justice joined a majority coalition consisting of all the Democratic appointees. Alternatively, the **RED** bars indicate the percentage of cases where the Justice was the lone dissenter from a majority consisting of the remaining Republican appointees.

JUSTICE AGREEMENT – All Cases

Figure shows the relative agreement (percent) in voting alignment shared between Justices in all cases during the 2024 Term.

Agreement can be understood as Justices similarly aligning in the Majority (or Dissenting) coalition – where those who concur (fully, in part, or in judgement) are similarly considered as part of the majority.

JUSTICE AGREEMENT – Closely Divided Cases

Figure shows the relative agreement (percent) in voting alignment shared between Justices in cases decided by (5-4) or (6-3) coalitions during the 2024 Term.

Agreement can be understood as Justices similarly aligning in the Majority (or Dissenting) coalition – where those who concur (fully, in part, or in judgement) are similarly considered as part of the majority.
